Insight: The modern consumer is drowning in low-frequency noise. There is a profound market deficit for grounding.

Solution: A pathway back to the Earth through the visceral sound of the didgeridoo.

STRATEGY: Decoupling the grounding of the craft from the friction of digital management.

Recording Checklist

- ☐ **STEP 1: HIGH-FREQUENCY ASSET CAPTURE.**
  3-5 short bursts (1-3 mins) weekly.
  Varied environments. NO EDITING.
- ☐ **STEP 2: PROCESS DOCUMENTATION.**
  Stationary camera. Capture physical labor: stripping bark, shaping, tuning.
- ☐ **STEP 3: BI-MONTHLY AUTHORITY.**
  Deep-dive instructional content (Circular breathing, mimicry).

CONSTRAINT:
Capture the raw vibration.
Drop the .mp4.
The machine does the rest.
